

✓ UiPath Studio - Important Settings

How to enable the "CLASSIC designer" in UiPath Studio

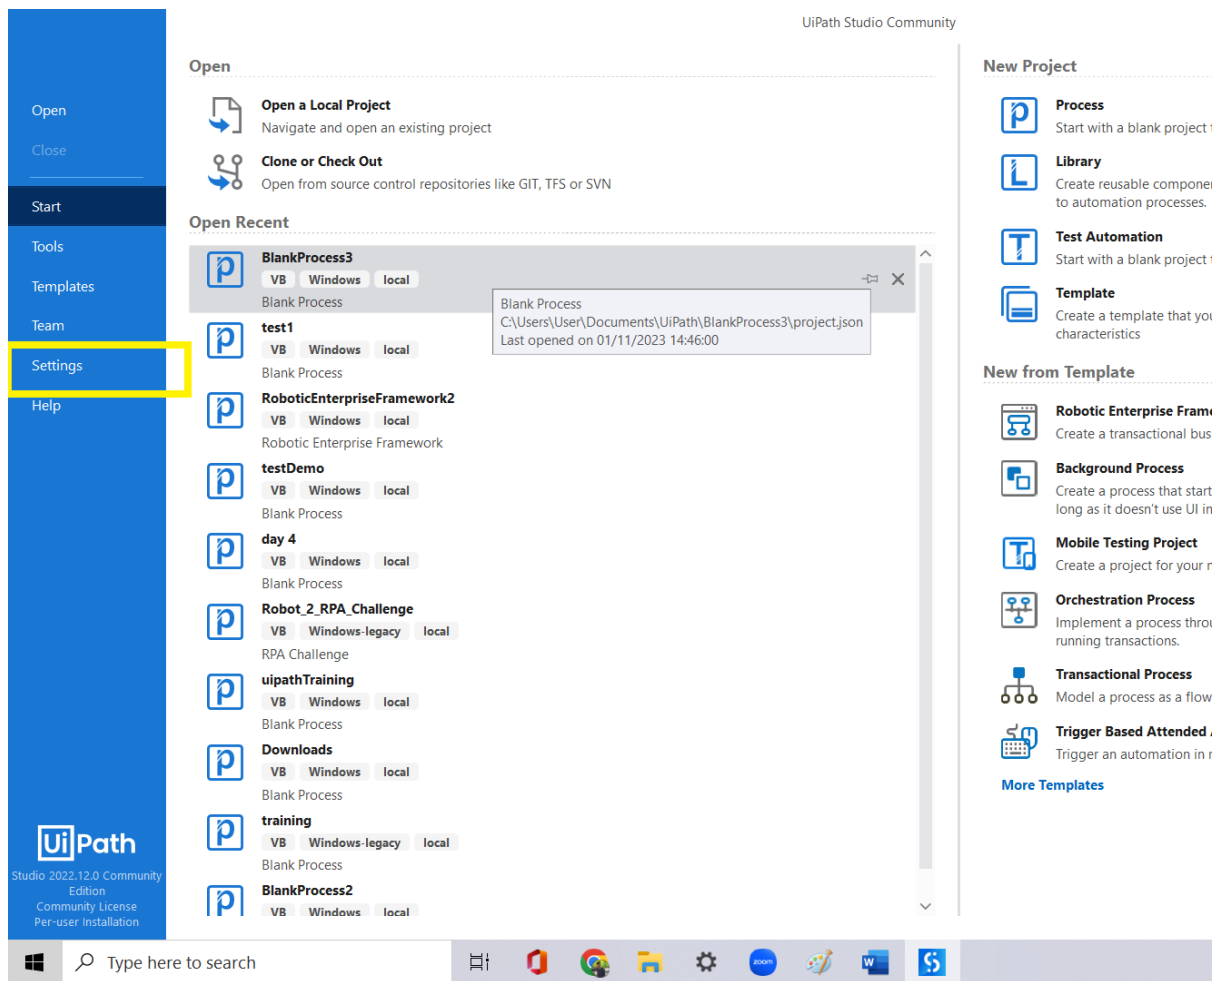

Most of the current enterprise solutions use are built using classic designer, so let's use that for our bot implementation.

Please follow the below 4 steps to achieve it...

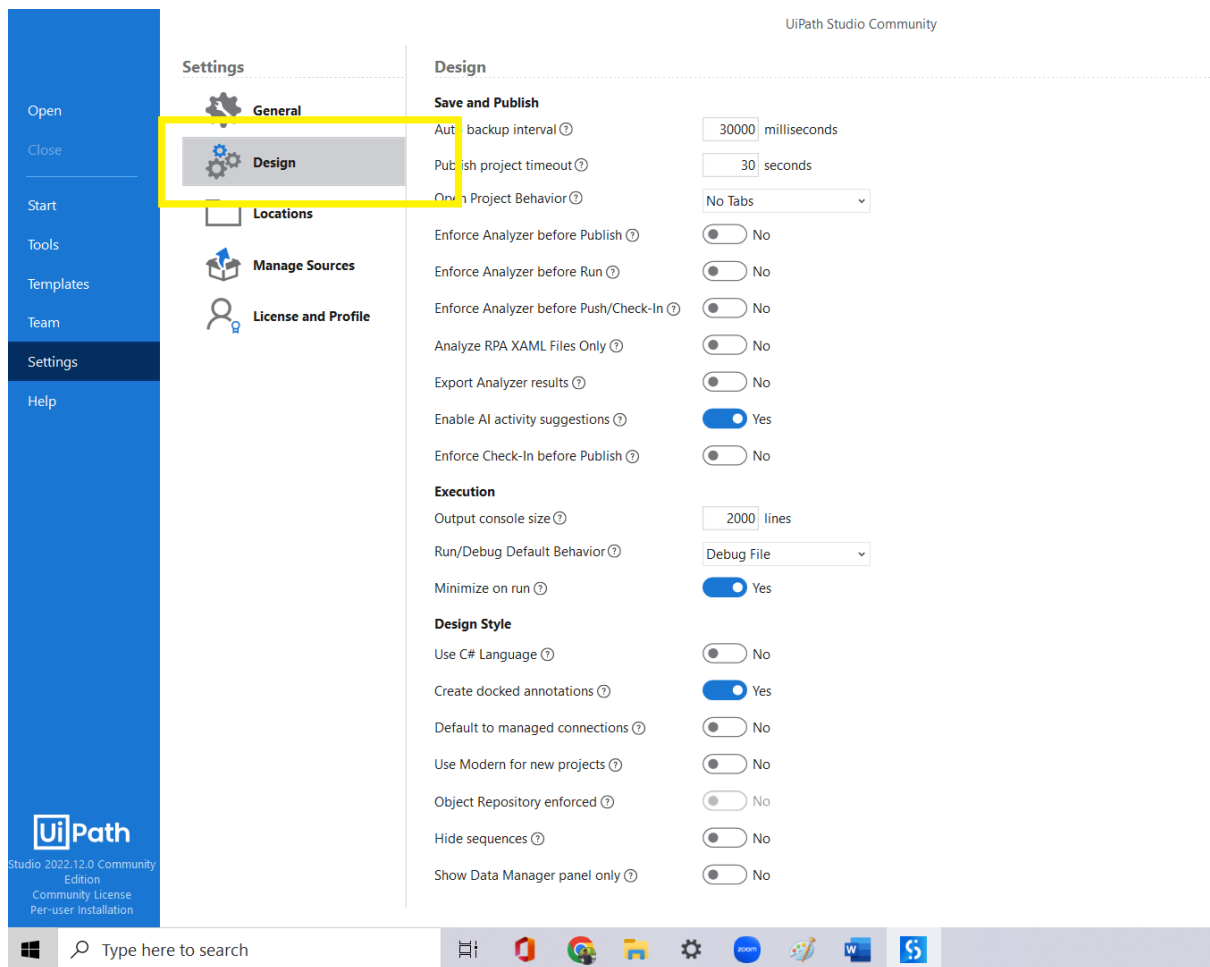

Step 1: Start for UiPath Studio and launch it

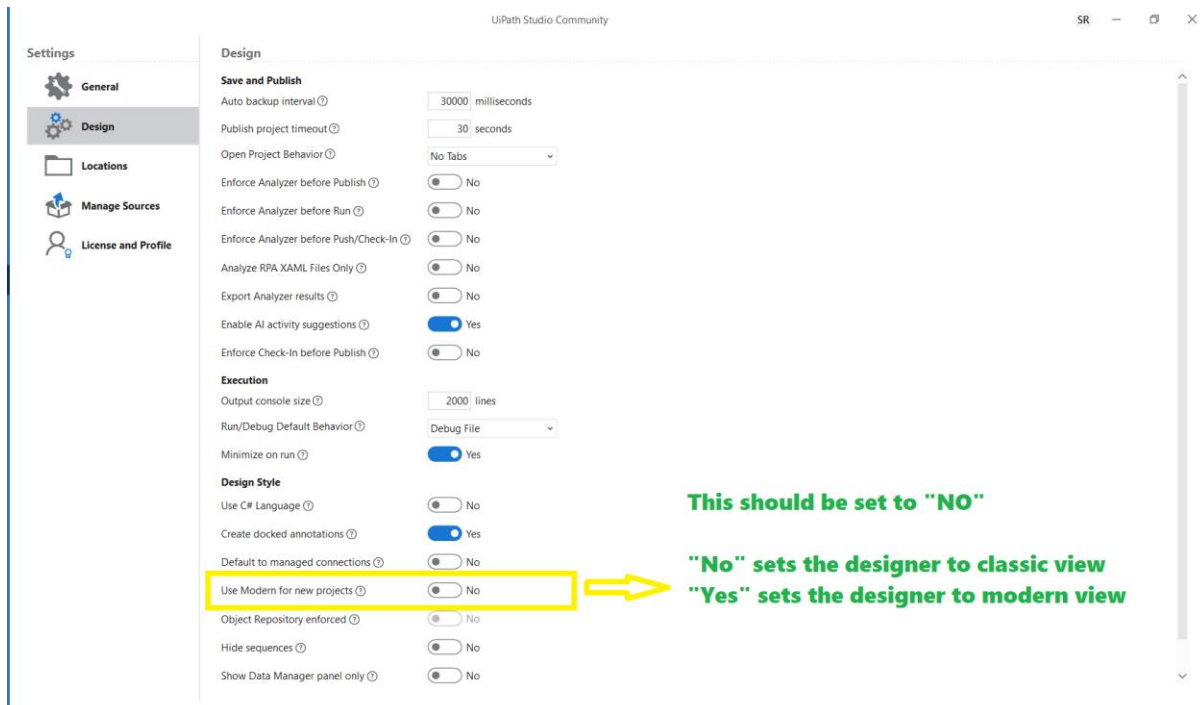

Step 2: Please select the "SETTINGS" option as highlighted in the below screenshot

Step 3: The select “DESIGN” option as highlighted in the below screenshot

Step 4: The "Use Modern for new projects" option should be set to "NO" as highlighted in the below screenshot.

Congratulations, we are all set now to start out automation projects!!!
